Sequence 81, Application US/10320231A
Sequence 81, Application NO US20030194405A1
GENERAL INFORMATION:
APPLICANT: Neben, Steven
APPLICANT: Takeuchi, Toshihiko
APPLICANT: Takeuchi, Adrian
ITILE OF INVENTION: Area ment Of Asthma
TITLE OF INVENTION: Treatment Of Asthma
FILE REPERENCE: 7430*163
CURRENT APPLICATION UNDMER: US/10/320,231A
CURRENT FILING DATE: 2002-12-19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       LIKNOVSLITCLVKGFYPSDIAVEWESNGOPENNYKTIPPVLDSVGSFPLYSKLIVDKSRW 300

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

C; Complex: An immunoglobulin heterotetramer subunit consists of two identical light (ka hain disulfide bonds. In some cases, such as IgA and IgM, the subunits associate into l C; Superfamily: immunoglobulin C region; immunoglobulin homology
C; Keywords: duplication; glycoprotein; heterotetramer; immunoglobulin
C; Keywords: immunoglobulin homology <IM3-
F; 20.6 **Domain: immunoglobulin homology <IM3-
F; 20.9 **Of Domain: immunoglobulin homology <IM3-

A;Title: Five putative subclasses of swine IgG identified from the cDNA sequences

A;Reference number: I47158; MUD:95015845; PMID:7930579

A;Accession: I47158; MUD:95015845; PMID:7930579

A;Status: preliminary; translated from GB/EMBL/DDBJ

A;Molecule type: mRNA

A;Residues: 1-277 < KAC>
